#### - Mayor Ellis' Survey

Progress on a broad front to keep pace with Belleville's steady growth was indicated by Mayor Bills in his address at the inaugural meeting of the new Council yesterday.

As outlined in yesterday's issue of The Intelligencer, completion of the Pinnacle Street repaying work, and rebuilding of North Front repaing work, and rebuliong or sorth Front Street to 60 highway, along with the construc-tion of a new bridge on College Street, will be the major city projects this year. The opening of Sidney Street for its entire length and a start on the Dundas Street project

are also anticipated.

Probably the most alguinteant project envisaged by the Mayor, however, is the establishment in this area of colleges of applied arts and technology. These would consist of a centre of technology. These would consist of a centre of technology, area consistent of the control of the consistent of the control of the control of the consistent of the control of

provincial governments.

Mayor Ellis said the colleges would serve a
wide area, perhaps extending over a 50-mile
radius. They would not necessarily be residential schools and for this reason, he added, it
was essential that the institution be built in
reasonable proximity to a centre of population.

with this desire we concur. The need for such an institution of higher learning has been unentloned in this newspaper. If it were located here or in the vicinity it would be of incalculable benefit to the community and the surrounding

But first things first. It will likely be some time before such a project gets under way. However, given he necessary approval and the cooperation of neighboring municipalities, we could expect the colleges to become a reality and that, ultimately, they would be granted university that ultimately, they would be granted university versity at Pot and the property of the lackbread to the versity at Pot and the property of the lackbread college of Fine Arts.

Although Mr. Ellis said Belleville would support a suitable site even if it were not in Belleville, it is surely not too much to expect that this city, being the largest in the Quinte district, should have strong claims as first choice

#### Teaching Is Popular

The teaching profession is not an easy one, demands special gifts. Knowledge of the subject is a prime requisite, but this is of little avail if the ability to communicate such knowledge is lacking.

Interest in the student is also necessary, for the student is not just a member of a class or grade, or one with a number appended to his school record which indicates his so-called IQ is such and such.

Examination time arrives and the teacher's responsibilities increase. There are papers to be set and marked.

Then again, the co-operation of the students is vital to good teaching. If students are disinterested, even unruly, the teacher is unable to give of his best. Some teachers are able to exercise more control over students than others. It is all a matter of temperament and personality.

ality.

In any event, the teaching profession is becoming increasingly popular with young people. Whether, it is the short one and two-year courses which enable them to enter the ranks of the profession, or the forest area of a combination of both, statistics show that teaching is a popular choice of young people leaving high school.

Of 1,618 students who replied to a Canadian Chamber of Commerce questionnaire, 22 per cent listed teaching as their first choice. Manufacturing, with 19.5 per cent, and natural resources, with 14 per cent, came next.

Teaching led the field in Quebec, Saskatche-n and British Columbia, and tied with nufacturing and government service in Al-

In Ontario, 26 per cent chose teaching, a close second to manufacturing (26.5 per cent), which of course is a natural choice of many in this industrial province.

#### Kashmir Issue

The interesting thing about the Indian-Pakistani discussions is that they are taking place at all—and under Soviet auspices at that. Prime Minister Shastri of India and Presi-

dent Ayub Khan of Pakistan are meeting in the Soviet Central Asian city of Tashkent, having been invited there by Soviet Premier Kosygin.

The main issue of course, so far as India
and Pakistan are concerned, is Kashmir. Because the people of Kashmir are mainly Moslem,

Pakistan, as a Moslem state, lays claim to the region. It claims that if a plebiscite were held Kashmir would vote for union with Pakistan. India, on the other hand, has no intention of giving up Kashmir which it now controls.

Thus the two countries are at an impasse which they are unlikely to resolve at Tashkent.

Perhaps the only answer acceptable to both sides would be neutralization of Kashmir, or even a form of independence. In any event, it is far better to have the

leaders of the two populous Asian states meeting at the conference table than their respective armies engaged in warfare which neither can Still more significant is Russia's apparent sincerity in trying to effect agreement between the two. Even though, where the Soviets are concerned, self-interest is involved.

#### New World Origins

Of all the bodies of water that separate

Of all the bodies of water that separate maximus and continents, probably the most remote and least publicized is the Bering Strait, the northern sea lying between Alaska and the eastern seaboard of the Soviet Union.

A mere 30 miles separates two vast continuations of the season of the source of the season o

The Indians of both North and South Americe (the Axtecs of Mexico and the Incas of Peru, for example) and the Eskimos of our own Arctic regions all trace their beginning to what is now

Soviet Asia.

Similar too in their origins are the Japanese whom, we are now told, were the first pies now set foot in the New World—an what is now Ecuador about 3,000 B.C. This would have been 4,000 years ahead of Lelf Ericson's landfall in NewYoundland sometime around the year 1,000 A.D., and 4,900 years ahead of Columbus.

Samples of pottery unearthed in 1961 by Ecuadoran archaelegist Emilio Estrada and more recently by American anthropologists Betty Meggers and Ciliford Evans bore striking simil-arities to pottery of the prehistoric period in Janan.

The American husband-and-wife learn (they are both members of the Smithonian institute, Mr. Brans being curstor of the diristion of cultural anthropology speculate that a fishing boat, caught in a typhon off the coast of Japan, was aweng leaven in the presulting occan currents, awinging first northeast, then southeast on an 8,000-mile are across the Pacific that finally brought it to Ecuador. The American husband-and-wife team (they

brought it to Ecuador.

According to Dr. Meggers, the Japanese probably encountered in Ecuador people who looked much like themselves, for the Ecuadorans likely had come from Asia, across the Bering, Strait, between 25,000 and 40,000 years ago.

Desire, newteen 25,000 and 40,000 years ago. Thus a fascinating new dimension has been injected into the spate of research work that has been earlied out in recent years with regard to the early beginnings of recorded history on this combinent.

The Japanese landings, accidental as they were, bear no relation to the subsequent North-American experiences by the Securitions by the Securitions are an advantage of the Securities and south America were already inhabited by primitive Asialate peoples. Nevertheless, to the Japa, apaparently, must go the honor of being the first or teach the New World by sea, as distinct from the much earlier migrations across the Security Securities.

#### Yea, Yea Still "In"!

That the Beatles are still in vogue may be gauged from the spate of black Beatle caps, as its Ringo Start, that the boys and the girls (mainly the girls) are wearing these days.

It is not surprising really, for the Beatles, as employed the control of recently, have soid no fewer than 150 million of recently, have soid no fewer than 150 million of recently, as expensed the service of the control of the contr

### Skis But Not Skiers

ROCHESTER, N.Y. (AP) — Karen Maka of Rochester has set up a match-making services for her fellow kidera, but it's skis she matches, not aktera. Doing business as the inter-national Broken Ski Exchange, Karen brings together kiders who have broken identical skir. They then may dicker for the

remaining good ait and other year as a secondary of the company of

noe's benefit."

Karen started her business sith a post office box, a stack of filing cards and a supply of mimeographed letters and information blanks, then placed an advertisement in a magazina

bis.

Now, she is having business eards printed. These she plans to hand, with a sympathetic amile, to owners of broken akis whom she chances to encounter on the slopes—a nice way to combine business and her favorities receit.

dges damaged by U.S. bombing. That the U.S. bombing is having some effect may be gauged from the officers' statement that the people of the north are "sick of the bomb-ing...and often curse the government for send-ing troops to the south and causing the air at-

tacks." Be that as it may, the people, according to this captured pair are too frightened to oppose their leaders. This is virtually an admission that the people are well aware of the communist ag-gression against the south (quite apart from any interpretation they place on the American pres-

ence).

"By the use of propaganda, Ho Chi Minh scorns the U.S. peace overtures, lets it be known the North Vietnamese are prepared to light on for years, and tries to convince the outside world that the people are solidly behind him.

### U.K. Trade Boost

Britain's trade picture is improving. According to Aims of Industry, exports for last November alone totalied £412 million, or more than a million dollars, and entered the New Year with a record £100 million order from Saudi Arabia for along the descriptions.

record £100 million order from Saudi Arabia for aircraft and equipment.

Nor is British inventiveness on the wane. A Liverpool shipyard has designed a freighter to cut the time spent in port by cutting the vessel itself in half.

Itself in half.

One part would house the engines and crew and the other half the cargo. A fully-laden freighter could enter port, exchange cargo scellons, and be on its way within hours.

### Soviet Tactics

The Soviet Union steins very keen to have India and Pakistan settle their differences over Rashmir. Mooscow has ulterior motives of course; it does not want China to take advantage of the dispute—for example, by bringing Pakistan into the Peking orbit.

the Peking orbit.
While it prevents this superficially benevolent image with regard to the integrity of India
and Pakistan, Russia is less disposed to use its
influence to bring an end to the fighting in Viet

Nam.

In fact, the indications are otherwise. A Soviet mission now visible flanol has apparently been dispatched there for the purpose of loosting aid to the communist side in Viet Nam. The mission, headed by Mezander Sheighin, described as a young right-hand man of Soviet Communist Party chief Leond Berzhere, includes experts on armanent and rockst warfar.

Armanent and rockst warfar, all their guiletude during the last few years, the Soviets are not willing to hand the West anything in the nature of a propagand selectory stemming from Washington and the selection of a propagand selectory stemming from Washington and the selection of the propagand selectory stemming from Washington and the selection of the propagand selectory stemming from Washington and the selection of the propagand selectory stemming from Washington and the selection of the propagand selectory stemming from Washington and the propagand selectory stemming the propagand selectory selectory stemming the propagand selectory selecto

of a propaganda victory stemming from Wash-ington's current peace drive. Nor are they anxious

ington's current peace drive. Nor are they anxious to halt what they know is a war of attrition that is costing the Americans dearly.

Basically, the Soviets are still the same intransjent people who tried to squeeze the western powers out of Berlin, still control a large emern powers out of Berlin, still control a large empire composed of once proud and independent people in eastern Europe, and enablatian an inocurtain of watchiowers, machine guns and barderd wire along their borders. Their ultimate aim is still the conquest of the capitalist world, either by ideological means a world, which was the world with the confidence of the capitalist world, either by ideological means of the capitalist wind, either wars like Visit and the confidence of the capitalist with the world with the confidence of the capitalist with the world with the world with the capitalist world.

These are aimed at depriving the western of its wealth and substance, even its will

### Soccer Dispute

SOCCET USIDUE

Soccet, it is claimed, is played by more people in more countries than any other game. Certainly the game is a fast and exciting one, as anyone who has seen the top teams and ace players like Statelley Matthews can teldify, and administration are forever getting involved in contentions issues. Down in Latin American it is almost as much as your life is worth to play soccet—or wors still, be a referee—such are the passions and degree of partiginable paroused by the passions and degree of partiginable partiginations.

the game.

The latest rumpus on the world soccer seene involves such unlikely sparring partners as the Scots and the Russians. And caught in the middle, in a attuation that would do justice to something out of Gilbert and Sullivan, are the long-suffering Irish.

With Gingsow Cellu scheduled to piay a European Cup quarter final against Dynamo Kive in Tritis, Georgia, on January 19, things

Kiev in Millis, Georgia, on January 19, things have reached an impasse over travel arrange-ments. Celtic had agreed to the game being transferred from wintry Kiev to the balmy south-ern city, but balked when the Russians said they must make the journey by Soviet airliner

We are not going to be dictated to," said manager Jock Stein. "We insist that we we are not going to be dictated to," said cell-timmanger jock Stein. "We insist that we charter our own plane from the Irish airline Aer Ingus. Moreover, we insist on flying straight to Titiks. That would cut our journey by 14 hours. We want our players to go by the best and shortest route, and to eat the food they are used to."

Skinia viewpoint makes sense. On the other hand, the Soviets probably do not warn strange aircraft flying in forbidden air space in the Bal-kans and the southern regions of Russia Bussa southern regions of Russia Bussa southern regions of Russia Suspania of Russia Bussa southern regions of Russia Bussa southern regions on the year communist territory.

In other words, if the Soviets cannot guarantee the sails passage of the plane they alonder than the sails of the sail of the sails of the sail of the sails of the sails of the sail of the sa

### Fresh Look At Auto Toll

More accidents could be averted if more people followed
the Christian commandment of
'love your neighbor."
This statement by Irwin Haskett, Ontario minister of transport, was put before the Chalmers United Church Men's Club
in Olfares.

"We usually think of accidents and safety as purely secular, as part of modern living that is outside the church. However, if we examined this subject in relation to the 'techings of the New Tretament, I think we would agree that the challenge of accidents should be appecially compelling, and especially compelling, and especially personal, to those of Christian coorcern," he said.

### Program for Indians

The reaction of Ontario's Indian population to the long-term plan to integrate them into Canadian society has been a good deal less than enthusiastic.

Entimization.

Loss of their ancient heritage is what the Indians fear most. This is understandable and yet it is difficult to see how they can make their way adequately in this world without adopting the white man's way of life.

Integration, if it is effected at all, is still a

long way off, and the Indians themselves may accept it eventually as the most effective way of fulfilling themselves both as individuals and as a people.

a people.

In an integrated society, moreover, the Induan would enjoy a much greater sense of kinable, of belonging, than they do now. Gondwould be the suspicion and animosity that lingers

at raising Indian standards of living. Under arrangements with Ottawa, the province has agreed to take charge of Indian education, hous-ing, employment, haw efincements, health, recreation and economic development. The new plan would seem to meet most or all the needs of Indians as enviasged by at least one of thirt spokement. Other light Canon, one ory Council of Canadian Indians, has said his people want overall improvement in housing, writers and education. Also contemptated are techniquely develop-

### Talkative Canadians

Canadians have done it again. They have wen the title of the world's most frequent telephone users for the 13th consecutive year. It does not seem right somehow, considering the competition of such heroic and tirreless conversationalists as the Greeks and the Italians and of course the French.

By Geo. H. Carver Sports Editor

And through his modus operandi the handsome sungster has achieved a ring status that no former tampion with the exception perhaps of Jack John-a, has attained. That of the beating faithful paying andsomely through the nose to see him defeated.

That rolls off the Black Muslim's figurative back like the traditional aqua pura off the duck down. I think he cares little what the public and the experts think. It's the bex-office that counts.

If there is the remotest possibility that Clay will get threshed the leather-pushing addicts will fill whatever harm or areas the fight is staged in plans the thouters and other places where the gloved watmai will be shown on closed-circuit television.

Strangely enough Clay selected at his next op-ponent Ernic Terrell, the man adjuged by the experts as the most likely to succeed in handing the world champion his first protected and defeat.

Perhaps he was taking a short cut for Terrell has established the fact he is the "long ahadow across the Clay inture," whom he must eventually meet before the championship jig-saw puzzle pieces fall into their proper

Jee Louis doesn't think Terrell will best Clay but 'he'll give him trouble because he's tall and get that great left hand. Maybe he's got a right if he'd use it. He won't win but he'll give Clay a fight."

Das Dasiel, associate editor of Ring Magazier, Das Dasiel, associate editor of Ring Magazier, the Shile of boxing args. "On the basis of what Terrell and his stiff left jan showed against George Clavrals, the challenger would have a good chance to destrace CLAy. It would be left jan against left jab with Clay's right a more potent factor than Erniet."

gibler. He sald his record showed that he has wen ji fight by a knecked and "all of three kneckysis were the result of jickland paneleen." City hasen had the chance ring-wise to demonstrate whether he said strike whether he privates or a distance remove. Terrell has. In feet crystate was a said as fer-ward in his fandange with Chursin.

If hack-pedaling Ernic can flick that repier-te Jab iaso forward-running Cassius with any degree success, this tussic could develop into a track and fed event. They might stage the best as a fifteen apper" instead of the customary number of rounds.

With Mr. Shastri's death, there may evolve
a closer bond of sympathy between India and
Pakistan, a desire to let bygones be bygones and,
ultimately, solve the thorny problem of Kashmir
which remains the main issue diving the two

While the Kashmir problem remains, it was a statesmanilite decision to leave it in abeyance so as not to stand in the way of a general agreement paying the way to a resumption of more prescribly relations.

The nine-point Tashkent agreement provided among other things for withdrawal of troops from disputed frontier regions. Restoration of diplomatic relations and a policy of non-interapplicates relations and a policy of non-inter-ference in the internal affairs of each are other factors which should contribute to a lessening of tension between India and Pakistan. given instruction on the period in which a com-poser lived and so on.

Beginning with children aged six to ten and progressing gradually, the curriculum thus includes the history, as well as the philosophy and literature with which the musician aligned

As a result of this course in musical appre-ciation, school authorities have noticed "a more developed understanding and freer spirit" in the young people. Not only that, but their marks liave been higher in all subjects and they have demonstrated their interest in subjects outside the normal academic programs.

### Mr. Wilson's Skill

In the current state of uncertainty that marks the evolution of the Commonwealth, the multi-racial organization needs a strong hand at the helm. This it has in the person of Britain's Prime Minister Harold Wilson.

When Mr. Wilson was returned to power as head of the second postwar Labor government he had a reputation as an astute politicals. At the same time most of his experience had been in Opposition. How then would he fare under the pressures of world events?

in opposition.

In opposition the pressure of world evening the pressure of world evening the pressure of the

belieres will ultimately bring down the breakway colonial government. While secretly Willow colonial control was been as a secretly willow the secretical properties of the secretical properties and strong counter measures would have been political suicide.

Britain had only one choice—maintempt to be deep the colonial placed exclusively on annations. While this has caused the Rhoedsians to Ughten their bests caused the Rhoedsian to Ughten their bests caused the Rhoedsian to Ughten their bests make the second placed exclusively on annations. On the second placed with the second placed wit

going.
Still, Mr. Wilson believes the sanctions will SUIJ, Mr. Wilson believes the sanctions will lead to its capitulation. Meanwhile, other African nations continue to bernte Britain for not using force to bring down the Rhodesian regime and restore constitutional government. At the meeting of Commonwealth leaders in Lagoe, the prime minister of Sterra Lone, Sir Albert Margal, called on Wilson to employ military measures sequint Rhodesia.

Margal, called on Wilson to employ military measures against Rhodesis.

But Wilson was ready for such a suggested and the successibly and effectively as he had successibly and effectively as he had successibly and the successibly as the successible as the succ

Mr. Wilson thus neatly remnined his Airican critic that neither he nor any of the other in-dependent African states are in a position to embark on any military adventures against the powerful Rhodesian forces. And Britain itself has sound political, as well as practical reasons for not delige to a. for not doing so a Prime Minister Wilson has demonstrated his

realism in other matters concerning Rhodesia. ### Jet Needed

External Affairs Minister Paul Martin's suggestion that it is about time the Canadian government had a long-distance jet aircraft for official use is surely a reasonable one.

Gifficial use is surely a reasonable one.

Recent ravel commitments by Prime Minister Feirzon and government colleagues emphasize this need. Mr. Pearson and government officials flew to the Commonwealth conference in Lagos in a chartered jet.

Meanwhile, Labor Minister John Nicholson,

### Inflationary Trends

Suddenly it seems we are paying more for crything. It is a reflection of the fact that December the consumer price index, Canada's cometer of living costs, rose to a record 140.8.

Increased food costs were mainly responsible, ording to the Dominion Bureau of Statistics, and this trend appears to be continuing through

January.

The index, based on 1949 consumer prices equalling 100, represented an increase of 2.9 per cent over the December, 1964 level of 138.8. er prices over this period include those paid Higher prices over this period include these panels for dairy products, fats, eggs, beef, pork, real, poultry, fish, some vegetables and gruit. To-bacco is also costing more, and in another sphere—home heating and lighting—some county resi-

denis say their hydro bills are up. For parmis with young families the increases in dairy products are particularly disappointing, in dairy products are particularly disappointing, a letter on this page today, from a local dairy company, points out that the increase in the price of milk eighen form a directive issued by the Outar's Milk Marketing Board to raise the price paid to the farm producers. A Parable for Question

# Dave's Hideaway

Dave Charles-Because of a few inconsiderate people Belleville teens may not be able to have another teen dance at St. Michael's.

St. Michael's.

Are you responsible for what went on after the dance? For those not familiar with the story, on Saturday, January 8, J. B. and the Playboys put on a fantastic show to a capacity house, and everybody had a swinging time until the dance was over. The messain the coat check occurred without warning or

deal. This is a true indication that you are listening would like to be part of the show. But the state is the state in th reast inve or six times on "voice Your Choice" and I, would not heatstate to place all 12 on the file, however there are other songs to be considered. The high-school hitfinders seem to agree that the Beatles are number one. "Poor Ann" by J. B. and the Playboys received three times the-requests it received the week before. Maybe this is the reaction after the dance.

### Rail Agreement

Inevitably, something had to be done about providing adequate rall connections between Ottawa and Turonto via Brockville and points west, including Belleville.

This had been an issue ever since Canadian Pacific and Canadian National ended their pool train arrangement which provided for quick connections at Brockville for Ottawa passengers.

When Canadian Pacific decided to discontinue its Dayliner service between Brockville and Ottawa it left intending travellers in this area without a direct link with the capital. CP announced the Dayliner service would in fact be continued, but when schedules were announced it was apparent they were not de-signed to tie-in with the new Canadian Mitional ales between Toronto and Montreal

signed to licin with the new Canadian National exhebules between Toronto and Montreal.

The solution, as announced by the Board of Transport Commissioners yestereday is for Canadian National to take over completely the operation of passenger services between Toronto and the Commissioners of the Commiss more on freight.

### University Experiment

Universily Experimen!

The announcement that York Universily in Toronto plans to turn Glendon College into a bilingual "incubator" for Canada's political elies of temporary and the college and the college and the college will repeat the college will pectatize in publication. The liberal arts college will specialize in publication of the college and support of the college and an admitting only those students planning four-year hooser courses.

There will be atrong emphasis on the social scenera, as well as on literature and languages, and according to Secott Reid, Glendon's principalities of the college and aptation.

To this end, the college will be a centre of numerous pollutical dicustical clubs. The college admitsher

To this end, the college will be a centre of numerous pollutaci clubs. The college administration plans to invite politicians and senior government admistrators to live in residence for periods 'anging' from a weekend to a year. "I hope that the institution of these programs will enable the part generation to make a better show of managing national affairs than my generation did," Mr. Reid, a former diplomat, in the contraction of the programs will enable the part of the programs of the pr

my generation did," Mr. Reid, a former upromas, is quoted as saying.

The idea seems an excellent one, but it could

have drawbacks. The very exclusiveness of such a college could turn out a product well-honed in political theory but completely out of touch with the grass-roots problems of the country—and worse still, little in common with his fellow students from other universities and with the mass of Canadian people.

attention. Society, is one thing, that you be the stopped to the social point of the s mass of Canadian people.

There is a danger Glendon may become much
too rarefled an institution to be really practical.

To be effective, Glendon should become not
so much a place of experiment in the numanities,
but rather the ideal for the raising of standards but rather the local for the ruising of standards at all universities in Canada. As we have noted, the concept is a good one, but why limit it to Giendon? The program the college envisages should be absorbed either in part or entirely by other Canadian universities.

If Canadians are to make a better job of the If Canadians are to make a better job of the future it must be the task not of an exclusive few, būt rather students all over the country imbued with the ideals of service and integrity allied to a sound but not necessarily exclusive

### Air Lanes Hazard

Dear Dr. Molner: I read a magazine article about "minus" calorie (codic. As an example, an egg is 80 calories but 82 calo-ries are required to digest it. Canadians are reported to be travelling abroad in ever increasing numbers, mainly by air. This being so, we are bound to share the concern of the British airline pilots' association to the concern of the British airline pilots' association. The air lanes share been reduced from a width to the pilots of the British shales favored to th wegg is 80 calories but 92 cale ries are required to digest if Therefore, by eating an egg yo lose 12 calories. I would great appreciate further information - J. F.

The air lanes have been reduced from a width of 120 miles to 90 miles. The British pilots say that navigational errors on long distance flights can result in an aircraft being some 30 miles off course. Some have been as much as 45 miles

With as many as 100 jets over the Atlantic at peak hours the new regulations leave little margin for error.

industry provide employment

Industry is a vital and integral part of every community and the growth of each city is contingent upon the progressiveness of its industries. As our factories enlarge and expand new employment positions are created providing jobs for our ever increasing population.

Some, however, particularly those employed in the construction business and similar out-door labors, find continual employment more difficult to find at this time of year. This can be overcome. We, the undersigned industries, urge you to have that job done now while men and materials are readily available instead of waiting for the warmer weather. If we all co-operate with the "Do It Now" campaign our unemployed numbers will decrease.

Keep the wheels of industry and business turning this winter. Schedule your home, plant, office or store improvements for the winter months and create jobs for workers.

I do not know if some of the Gotham bockey ers believe in reincarnation but their generilla-ths on Boston's fiery Ted Green would have you too be in one of Bobby Huil's prine Hereford on theirs.

TED GREEN

But don't get the idea Green is a poor mixed-up sunderstood bockey player who believes a punch in the 25 is worth more than a puck in the net. Far from He rehemently denies ever going out to "get" as

But, he told a Boston writer, "Some players are slick, elever with the stick and fast. Others play it straight, give a little, take a little. I'm aggressive. That's my style and I wou't change."

threw his first body cheek and clenched his first body cheek and clenched his dad tried to step him from falling one his first todie from the crib. He admits to avoing a temper, a triffe quick on the draw and from his bockey childhood has believed in giving a farred in return for a fisticuffing his cui.

They say down Boston way they staged a moci flest to decide the fastest on the hockey draw, or the ickest at abedding the gloves and squaring off. Green in it in nothing flat.

As far back as be can remember, Green says, ho was taught to "dish dut more than you take. It is what is expected of me—to hit hard and often. And in even new league I played in, my reputation as a fighter preceded me."

This enemy-tabbled plug-ugly of the blueiline constab-ularly has shown he can play bocker too. A year ago and in the mid-season all-star balloting he was rated the third best rearguard. The wise ones penetrated the veneer of lumberjack tactic and reported his trans-formation from a brash, awkward brawter to a forceful but intelligent defenceman.

"Sure, I matured," he said. "I mellowed and began playing 45 minutes a game, taking my regular turn, playing the point on the power play and killing penalties. I was just too tired to do any fighting."

If they put players' "skate-prints" in cement in the front of NHL president Clarence Campbell's private desk, you would find four sets of the Green underpinning on the carpet.

"Each of three times," he said, "followed be-came of run-ins in New York." Green is the red rar to the Stanger bulls of the balcoules. They ride his namercitally and the nati-Green business reached new heights a short time age when Bill Jennalogs, the Biner' president, "peals bounty on Green's hide."

The hattle chant of the Ranger fans, some 14,000 hem is "Get Green," Said a Boston rer, " the opposition gets the cue because they we something's get to give—and it usually does."

What does cause Green some concern is that peop believe the uncomplimentary things said about hi-cially after he was charged with deliberately spea Phil Goyette.

He emphatically denies my deliberation on his part. "When a gay starts giving you the high lumber, you've got to protect yeartell. Guy serve coming at me all night. I never would have speared Goyston. I whited around. It was na secident. Goyette would not hurt any guy in the world. I'm doosetty serve,

EVERY PHASE OF REAL ESTATE

In our first year of operation 12 years ago, a total of less than 40 were sold. Since that time our business has consistently grown to the point where we now handle almost four sales per week, or 200
units per year. In addition to this, a most comprehensive mortgage and
appraisal service is available to the public. As well we offer residential
industrial and commercial rental service.

We would like to thank the people of Belleville and district for the trust they have placed in our firm, and assure you it is our intention to continue the same calibre of service in the future as in the past.

### **Tourism Needs Boost**

The Ontario Economic Council's suggestions the boosting of tourism in the province are tudy in contrasts.

On the one hand, the Council advocates a

government promotion campaign modelled on the hard-sell tactics of private enterprise. "In many respects," the Council says by way of ex-ample, "selling Ontario's touts't industry is no different from selling cars ours rent from selling cars or any other co act calling for a consequential inw

A Harvard University psychiatrist has sug-gested that children should be taught how to drink alcoholic beverages in ichoots. Group instruction in social drinking, he says should begin with very weak drinks in the elementary grades and continue through school. The proposal of Dr. Morris Chalets, who is the director of the Alcohol clinic and acute

asso director or the Account climb and acute alcoholic psychiatrist service of Massachusetts General Hospital in Boston, is not as revolution-ary as 'it sounds. In fact, many parents in the western world follow this very practice of giving their offspring a little nip of beer and even spirits from an early

Prayne writes:—"Hill doem hasy what he did ask tria for, but on a question of shether his income cloding advertising contracts, TV appearances and per sidelines reach \$100,000 a year he paused for moment, then nedded.

How long will he stay in hockey?

Hall idd Fraym, "playing is not ferever. I've got no scoring records in mind, no record number of years I want to play. I'm a country boy at heart I'll have also years in after this winter. If I played fifteen, which would be six more, I'd be 32 or 32 years old. That might be enough."

# When idle equipment lowers your profits on-the-job training seems like a shrewd investment

If you face the prospect of costly equipment just sitting there with no one to run it . . . now is the time to investigate how you can fill the "skill gap" in your business through the Ontario Department of Labour's new Ontario Department of Labour's new program, On-the-Job Training—O.J.T. O.J.T. is a system of training on the job using your equipment, methods and procedures. Training is conducted in a work atmosphere. The Department of Labour can provide tech-

nical and financial assistance to help you develop your own O.J.T. program and locate

trainces.

The Province's long-existing Apprenticeship program has been extended to include many new trades. In addition, a completely new system of training—a wide range of short-term skill development programs designed to meet your own custom requirements—has been introduced.

Together these form the Ontario Department of Labour's overall program: ON-THE-JOB TRAINING—O.J.T. Ontario's economy TRAINING—O.J.T. Ontario's economy needs over 35,000 skilled workers now. Don't let this "skill gap" result in lost profits in your business. Take action now and investigate the advantages of O.J.T. For full details, write to:

Industrial Training Branch, Ontario Department of Labour, 74 Victoria Street, Toronto 1, Ontario

"Why doesn't Canada send its best team over here?" ied one Soviet newspaper. If blasted the rugged of Canadian play even as its sthietes nearly skated risitors out of the rink.

written such that was directed at them.

So let's step this monscare of Sending Canadian iteras to Russia and the accompanying waste of money. Canada has lost its former great position of producing the best anatters beckey clubs in the world. We may never regain our lost prestige.

So why feed the Russian ego by sending clubs over re to get clobbered and insulted?

If the Rods want is play the "best turn in Can-ada" let them cross sticks with our Zhanley Cup chimpions, or any National League tours, and teach them some and for all that this resurty still breeds the best hockey players in the world.

How to relieve BACK Fills for prompt

"Cut out that racket out there! I told you I have a hangover."

With ordinary, regular gasolines, the slow operating speeds and frequent idling of tractor engines cause excessive gum deposits in the carburetor. Not with CO-OP Farm Gasoline. That's because CO-OP Farm Gasoline was developed especially to meet farm division conditions.

driving conditions.
A special carburetor detergent eliminates gum de posits, kerps the throttle clean and prevents thos costly too-rich mixtures.
A built-in rust inhibitor protects vital engine parts reduces downlime to a minimum.

#### Price Squeeze

As we noted recently, the increase in the price of dairy products, along with a general upward trend in the cost of living, has hit hard at family budgets.

At the same time Agriculture Minister J. J. ne and spokesman for the dairy industry warned that the cost to the farmer-producer, and the low profit earned by small farmers in particular in comparison with industrial workers, were such that increases in the cost to the consumer were inevitable.

Now there is further evidence of the squeeze that is bearing down on the farmer and some dairymen. According to George R. McLaughlin of Beaverton, Ontario, some of the best and most efficient dairy producers in the province are leaving the industry because costs are running ith profits.

Mr. McLaughlin, who is chairman of the Ontario Milk Marketing Board, told a Dairy Farmers of Canada meeting in Toronto that their continued loss to the industry was a cost to the economy "as surely as if we were shelling out

"It is a loss of skills, managerial ability, capital investment and resources which our industry and the economy can ill afford," he Moreover, the Toronto report said Mr. Mc-

One of the more interesting recent medical developments is the growing suspicion that much monthly returnation and monthly genital idiocy may not be a product of heredity or aging parents at all but simply of in-fection. Some research on mon-golism, for instance, points to this conclusion. American re-searchers reported several months ago that a number of mongols seemed to have been born in a cluster at the same time, a phenomenon which is usually associated with infectious disease. They linked outbreak with the local dence of German measies.

Furthermore, two Australian doctors have suggested that mongolism seems to coincide with outbreaks of viral hepatitis at the time of conception. They found that the incidence of mongol births in Victoria in the last by years has followed a cyclical pattern and correctly predicted a peak of mongolism in 1962-63. The rise had fall of the mongol birth curve followed that of the hepatitis curve with an interval of about nine months. Moreover, they report ed that mongolism was more common in towns than in the try, another sign of infec tious disease. From these find-lags, they deduced that the hepatitis virus at the time of conception produced the chromosome damage which is

It is the right of every person to have freedom of choice whether it involves the election of a candidate for political office, the kind of clothese he wants to wear, the kind of schools to which he wants to send his children, the kind of a wedding he wants his daughter to have. So it is when it comes to the selection of a funeral. The right remains that of the individual or family to select a funeral service of THEIR OWN CHOICE, at the price THEY WISH TO PAY, from the funeral director of THEIR CHOICE. No reputable funeral director would presume it should be otherwise.

### Shipbuilding Subsidy

A reduction of the shipbuilding subsidy from 35 to 25 percent for the next three years was announced recently by Transport Minister Pick-

The minister, as reported, gave no reason the reduction, other than saying that the of the subsidy is to maintain a healthy and ble shipbuilding industry in Canada.

viable shipbuilding industry in Canada.

Obriously, the government feets that maintenance of the subsidy, although at a reduced dustry. Introduced by the former Conservative government to Increase the industry's capacity of the conservative government to Increase the industry's capacity by the substitution of the conservative government to Increase the industry's capacity by the substitution of the industry's capacity of the programment of the pr

per cent level in 1972.

These are the main provisions of the new arrangements. There are others; for example the new rate will not apply to vessels built for the federal or provincial governments. \*\*For fishing vessels, the current level of 50 per cent \*\*\*Ull be resident.

Since the subsidy was introduced some are ago, little has been said regarding its lect on the industry. However, as we have ted, it must be enjoying a measure of pros-rity. We hope It will continue.

### The No. 1 Problem

The problems of the world, it has been said. The problems of the world, it has been said, are the problems of the spirit. Or as Toronto columnist Richrd J. Needham said recently, the greatest problem in the world—"the only real problem. . I would sometimes think—is its lack of joy."

mack or joy."
"Certainly," he added, "that is the greatest problem in Canada, in Ontario, and in Toronto. Joywies, laughterwise, howevies, happinesswise, as the advertising men would say.
"I'm prepared to argue," he went on, "that this city and province and country are desper-

Weil, that is all Mr. Needham has to say on this melancholy subject for the time being. However, he suggests there is a remedy and is going to advance it in-a-column later this month.

It should be interesting, for as the man said you cannot change human nature. And it is difficult to see how Mr. Needham proposes to change the Canadian character which, substantially, is how he describes it above

may, a now no escribes it above.

The remedy for many of us may lie in the fact that more and more Canadians are travelling abroad. Yet incredible as it may seem in our affluent society, a much greater number, has never been overseas.

never been overbeas.

What we dour North American Anglo-Saxons need is greater first-hand knowledge of the world outside, more contact say with the warm and friendly Italians, the fun-loving Spaniards, and the voluble/and generous-hearted Irish, whom Salvador de Madariaga once described as "Spaniards who went north and got lost."

If you do not want to trease.

"Spaniards who went north and got lost."
If you do not wan to travel so far, there are the smiling and welcoming Medicans to the south. And if you can barely afford to move outside this province, then who better to become acquainted with than the people of Quebec. After all, that is what is being urged upon us from public platforms. The French-Canadian, morrower, ja more sware of the true meaning of joy and laughter than we are.

### Fiery Diplomat

Who is there who has not felt frustrated at his inability to come up with a swift retort when the occasion demands. Some have this gift, but most of us lack the lightning mental reflexes required for this kind of verbal exercise.

It can be developed of ocurse. Members of the legal profession, and politicians schooled in the art of debate, are usually adept at the art. One way of training onself is to be a good lisi-ener and to remain calm in the heat of verbal

We were thinking along these lines white reading the story of Arab diplomat Jamil Burody. A veteran of 17 years' service at the Buthe commands respect to other long-winded Buth the commands respect and sometimes is devastating.

devastating.

As for example, when he was describing the plight of Arab refugees from Palestine and there was a ripple of laughter in the gallery. Swinging around in his seat, Baroody glared at the

may, or you would not find this so amusing."

There was no sound from the gallery the rest of that day. Mr. Baroody had spoken. And how many times have we felt like speaking in similar vein, but the words either were not there or stuck in our throat.

# The tuned car report.

People are buying Buicks at a record rate this year. What's behind the switch to Buick? What's the tuned car all about?

If you were going to build a car, you'd start with four absolutely necessary building blocks: performance, styling, ride and handling. If you were going wouldn't stop there. You'd test and refine and blend until they were all tuned to work together. Your own favorite mechanic already gives you an idea of what the tuned car is all about when he tunes your car's engine. You know how smoothly and efficient-ly that engine runs? That's how a Buick runs. Not just the engine. The whole Buick. And that's what

Two years of punishment-me our Buicks in the laboratory. And on the road. We use our Proving, Grounds. (As other car makers use theirs.) But we also use parkways and freeways and country lanes and mountain chutes—the tuned car is tuned to behave ell on all kinds of roads; roads you'll actually be using. If you bought a new Buick and then, just for fun, gave it back to us to run it through all that testing again, can you guess when you would get it back? In about two years.

Before final assembly, every Buick engine is test run to be sure it's properly tuned and to provide

for controlled initial break-in. If there's the tiniest fault, back it goes.

You think you've got a tough job? We have a man stationed up north where in winter the thermometer can drop to thirty below. He's charged with climbing out of bed in the dark of cold mornings, going out to a new Buick which has been left out all night. and starting it. A car that will start fast enough to please him will please anybody.

The Inspector. -There are about 1250 people working in our engin plant. 180 of them are inspectors, which works out to one inspector for every 5.9 production people. The average engine is looked at, in component or assembled form, by 170 different inspectors. An inspector's word is law. If something isn't right, back it goes. Sometimes this makes our production people unhappy. But it also makes the product good and you happy.

# Frothing at the shocks.

When it gets hot outside, the oil inside the shock absorbers tends to become aerated. Or, to put it another way, it froths. Which makes it hard for the shocks to do much absorbing. Inside every LeSabre, Wildest, Electra 225 and Riviera shock absorber is whome, Electra 223 and inverse a stop to this kind of nonsense. It costs a little extra money to do this. But if you've ever ridden in one of these new Buicks, you'll know why we think it's worth it.

### Close.

No matter how hard you try, you can't practically make pistons to more than 3/10,600 of an inch tolerance. The same goes for cylinders, into which the pistons fit. So we use an ingenious mac that measures pistons and cylinders by air. And then we fit piston to cylinder individually.

### The "master" engines.

We not only balance all the engine parts separately, the way everybody else does, but we also balance the final assembly as well. We have machines for this. But, being Buick, we also have perfectly balanced "master" engines that check the machines that check the engine that you end up with. And

### Safety.

Everybody knows that the real key to safety on the road is the driver. We thise our sister divisions at GM) try to make every trip a safe trip for you. So we put back-up lights, a pudded dash, padded sun

visors, seat belts front and rear, and two-spwipers and washers in every one of our cars. Stand-ard equipment. So are two mirrors—an outside one and a shatter-resistant inside one—that are just bout indispensable. You use them when you're moving into traffic, to see what's coming up to pass you, to see if it's safe for you to pass, and a dozen other things. They're probably the most important glass in the car, if you don't count the windshield.

### Affordable.

A good many people have been brought up to believe that a Buick is some kind of a pinnacle, to be touched only after the kids are tucked away in careers of their own and you've Got It Made. Well, a Buick is a pinnacle, all right, but it's not nearly that hard to attain. In fact, many people who buy new cars are already paying the price of a Buick. And if you're going to pay the price of a Buick, you might as well get a Buick.

North America has spoken. Sending a brand-new car out into the world is a ticklish business at best. Even when you're absolutely positively sure you're got a winner, there's always that little niggling doubt. So we must report that the tuned car has been a rousing success, even more rousing, in fact, than we had allowed ourselves to hope. And we shall, by working very hard, keep supplying our dealers with Buicks, so that they, in turn, can keep supplying you with Buicks: Wouldn's
you really rather own a Buick?

1966 Buick. The tuned car.

Unlawa Kall Service
Train service between Toronto and Oilawa,
with stops at Bellsville, has been restored, and
not a moment too soon. The uncertainty which
arose following the decision of the CPR and CNR
to end their pool train arangements between
Toronto and Montreal, leaving Otlaws out on a
limb as it were, has been resolved with the announcement that the CNR is taking over the ser-

vice.

The new schedules seem adequate. Canadian National is providing two trains daily in each direction between Townson and Olawas, with a contract of the c

express service, and is certainly not designed r anyone wanting to spend a day shopping in

ing to spend a few hours visiting friends, this can be accomplished (after February 14) by taking the morning train due in Ottawa at 3.55 p.m. and returning on the 11 p.m. train due in Belleville at 2.55 a.m. the following day.

### Security Risk

Security Risk.

Prine Minister Pearson, under strong pressure to explain the government's attitude toward.

RIGMP asservations of former Vancouver postal cirk Victor Spencer, indicated last week that he may make a statement on the subject shortly.

He was repyting to a question by NDP leaster before the strong of the subject of the strong of the stro

man an opportunity of clearing his name rather than remain for the rest of his life under con-stant surveillance by the RCMP.

Opposition Leader John Diefenbaker viewed

Opposition Leader John Diefenbaker viewed the surveillance of Spencer, in the absence of specific charges against him, as a violation of his rights. Mr. Cardin did not reply when the Oppos-ition Leader demanded: "Tell me any law which allows surveillance to continue after a govern-ment has decided that there is no offence upon which a court should be given an opportunity of deciding whether or not there is a case."

In reply to other questions, Mr. Cardin at-tempted to justify the surveillance of Spencer on

tempted to justify the surrelliance of Spencer on the grounds of national security. Nevertheless, there is still the matter of Spencer's rights as a citizen. If the government does not see fit to bring charges egainst him, then he cannot be regarded as a dangerous secur-

In all these circumstances, a statement by Mr. Pearson is desirable. If this man in British Columbia is regarded as a serious security risk and must be shadowed, the prime minister abould say so. If not, he should be given an operunity to rehabilitate himself. Meanwhile he apparently has no job and has lost his pension

## Welcome Blizzard!

When a storm of Sunday's magnitude des-eends on the province it is in a sense like manna from Heaven. Variety is the spice of life and late-ly we have not had much variety weatherwise. Around Christmas there were days it was like June in December and although citizens looked vaguely pleased with life there was something

missing.

Missing, of course, was the snow which usually covers the landscape so decorously at this time of year. And now we have got it — and everyone, or nearly everyone, is happy that it has

Certainly it is inconvenient, even hazardous, while the storm is in progress. As a waltress in a 401 restaurant put it at the height of the storm could be storm with the storm of the storm is over, and the plows but when a storm is over, and the plows

have done their work, and the sun comes out, is have done their work, and the sun comes out, is there anything in all the world to compare with the sound and aspect of winter in Canada — the crunchiness underfoot and the vision of the anow-capped mountains from the Laurentians to

the Rockies.

This is one thing that lures Canadians back from Hawaii and other places in the sun. They think they have had enough of winter, so they try to settle in some warmer climate — and discover their mistake. When all is said and done, it is lack of variety, in climate as in anything else,

that kills the spirit.

Now that the snow is here, winter aportsmen will enjoy what is their due, Most of us feel the better for it. The crisp air is filled with the laughter of children, whose delight at wipter's final coming is keener than their elters. Still, the attermath of a bizzard, and its challenges draws us all out. People look happier, healthier. The mid-winter gloom has been dispelled.

# **HOW WAS YOUR SOFTIQUE BATH?**

Last night, we gave you a sample of new Softique Bath Oil. Don't you agree it leaves you femininely soft and smooth all over?

WE HOPE you used your sample of Softique Bath Oil because soap and water dries out your skin's natural moistening oils.

And so does the weather as well as dry indoor heating.

Softique replaces those lost skin

oils-stops you feeling dry and itchy.

A remarkable dissolving ingredient spreads Softique all through your bath water - moisturizes your skin evenly and completely.

What's more, Softique's moisturizing oils protect your skin from the drying effects of weather and heating.

Use new Softique in every bath and prevent irritating skin dryness.

P.S. We're sure you noticed Softique's delightfully light and lingering fragrance-and how it makes an ordinary bath luxurious.

drought, and in 1964 when excessive rain spoil-corrors in some districts.

It is also interesting to note that consolidation of abandoned or uneconomic farm units will be continued. This program applies mainly to northern Ontario, but it is to be extended to

eastern Ontario.

The key words in the proposal to extend the program to this region is "where applicable." There must be many farms in eastern Ontario which fall into the category of either "abandon-wide fall into the category of either "abandon-wide" or "uneconomic," and whose future, better on worse, may be more adequately determined under government aupervision.

the resemblest supervision. Expansion of the Outside-Desethphina Agcopy into a new Cown corporation to provide
capital financing for small businesses is another
progressive step. It is easy in the mixt, of a
beling made by the smaller enterprise. Presumably the new corporation will facilitate the operations of such firms. This is of particular sigmilitance when it is considered that many small
public are producing goods for the export martipublic are producing goods for the export marti-

and ascipining of doctors and other medical profession may come as a surprise.

More details on the reasons for the setting up of this committee and elaboration of its terms of reference would be in the interests of both the medical profession and the public.

Another brief reference in the highlights of the Throne Speech has to do with a board which would rule on the release of patients from men-tal hospitals. If this system is not already in force, its introduction now would seem an excel-lent idea. Once again, though, medical advice should be given full weight in any decisions such a board might make on the mental competency of patients.

GREAT JANUARY-S A L E.

By Geo. H. Carver Sports Editor

The decision, it appears, is based for the most part on the treatment-off-the-ice of the Sherbreche team while in the land of the Nuncevites. The report of the restinent was first hand coming from CAHA vice president Pellock personally.

tilly at the pinck of the yawning does the choosy of high "It was the hast referencing." Policike said as this referre from Renils. "They only called four or five practities. There abouted have been more. The Sher-person of the property of the contraction of the of things, but the Existina players were just as rough, more so, in fact, One gd-define did a fixery a job of spectring our genilkerper as I've seen. Make no mil-take, they can be just it on you good, and this was now of that both itsees with it are serves authout players playing under conditions that ways the labels from:

After arriving in Moscow, the Beavers were buildled a bus before daybrell and transported over "ter-e snow-packed roads" 150 miles north to Kalinin re they had to borrow toques and sweaters to survive bilter cold.

A CP wire story the other day said the CAHA as takes some action on this Rassian tour business, i suggested the Russians take a "breathing spell" rom Canadises bockey tours,

This is not in reprisal but as the CAHA secret mager put it," because of difficulties encountering the previous Red tour.

### Varsity Art

One of the mosts attractive camping in the castern States is that of St. Lawrence University in Canton, N.Y., a mere dozen miles or so from the international bridge at Ogensburg. Its buildings, of rough stone from the nextry quarries at Gouverneur, have a solid, traditional as-

pect.
At Ogdenaburg is the Remington Gallery, with
Lie paintings of the early days of the American
west by the artist of the same name. Now St.
Lawrence University is contributing further to
the area's cultural facilities with a new art galtery of its own.
Cannon's proximity to the Canartist of the Cannon's proximity to the Canartist of the Cannon's proximity to the Can-

adian border, the first work to be purchased by aight the university for its gallery is by A. Y. Jackson, it was one of Canada's famous "Group of Seven." V. Si Argical Jackson work, the painting is a landscapagic the Far North done during a trip to the Artic last summer. It is entitled "Barren easig cander of the Artic last summer. It is entitled "Barren easig cander".

The Canton purchase is an honor for Can-ada, just as it is further recognition of one of Canada's betknown arisks. With the Centen-nial approaching it would be appropriate to ex-pect that the university might consider purchas-ing further examples of representative Canadian

### Canada Forges Ahead

No country in the world is making such awift connomic progress as Canada. The United States, Sweden, West Germany and Japan are atill enjoying boom conditions, but none is moving abread on so many fronts, or with such assurance, as Change.

it has often been said that Canadians are aged in a search for national identity and for ath that will lead them through an uncertain

"Who are we and where are we going?" That who are we and where are we going?" That is said to be the plaintive roy of the Canadian. But surely there is identity enough in the excit-ing events of the day, right here in Cafada. We are the people who are progressing as no other, what other country, moreover, has such bright prospects in terms of still untapped wealth and resources?

resources? No country is more concerned, for example, for the welfare of its young people. Certainly, there is neglect, lack of communication begiven parents and children, lack of discipline and supervision of the young. Yet by and large, the country as a whole cares very much for its youth, their welfare and happiness and educations.

### Pinch Hitting

By GARKY ALEXANDER

Some local know-it-all was overhead recently dalming, "There's no interest in junior bockey here to why bother going to the rink?"

Crewds have been better this season than for years. While as official attendance is given at Belle-ville's home games, crewds have been in the 604-100 area recently and are consistently up around 630-500. This compares with 100-300 in recent years.

If they survive this grind and make the playelfs look for crowds of 1,000 and more, as happened in playelfs last spring.

Still say no interest in junior bockey here? Well, everyone has a right to his opinion.
